Damage Control 'Raw'

Damage Control first release 'Damage Control' was released as a limited edition CD in Europe and Japan. Damage Control 'Raw' is now available as a worldwide download completely re-mixed and re-mastered with new vocal tracks and 2 new tracks.

Pete

Raw is the original inspiration as written and recorded by me and Robin. I know our fans will love this version of what I've always believed is a great album. These are not demos, this is a re-mixed and re-mastered finished production. This is an amazing album.

Chris

This is the best drum sound I've had on an album. Damage Control is a band, not a project and now that Raw is at last released we've scheduled recording album 2 for later this year. I'm really looking forward to it.

Robin

Pete and I wrote these songs and these are our original takes on subjects close to our hearts. This album is very different in vocal feel and intent. It's essentially Raw and genuine.

This is perfectly polished hard rock blues. The nucleus of this power trio remains, built on mutual respect and friendship. Featuring the mercurial talents of Pete Way, Robin George and Chris Slade
